

Uppsala, Sweden

## System engineers who want to make the world a safer place

Scienta Sensor Systems, the Xenon business line within Scienta Envinet, a high-tech company operating on the global market. A leader in its niche. The company sells, designs, manufactures, installs and services hypersensitive systems for detection of fission events such as nuclear testing and nuclear power plants with operational disturbances. A large number of systems are currently installed in monitoring stations and networks around the world. More recently, the company has been focusing on expanding its product portfolio and customer base. The Xenon business line is located in Uppsala and has a turnover of approx. SEK 40 million. We are a member of Scienta Scientific Group which has turnover of approx. EUR 50 million and 194 employees in total, 64 of whom in common premises in Uppsala.

**We are expanding and we are looking for engineers who can travel and who genuinely want to have the entire world as their workplace!**

**We are looking for you** who wants to work with installation, upgrade and servicing of advanced gas handling and detection systems for our customers around the world. The systems are used for monitoring the Comprehensive Nuclear Test Ban Treaty. You will also work on the final testing of our systems, which includes both hardware and software. Furthermore, you will work with documentation and quality improvements, as well as customer support via email and telephone when you are back home. Your workplace is our head office in Uppsala, where you will be a member of a close-knit team.

**We consider it a plus if you have** MSc, BSc or equivalent with at least a few years of relevant work experience. Great passion in technology is a prerequisite for working with us together with customer focus. Experience from advanced technical support work is an asset but your personal qualities are at least just as important. As a person, you should be independent, responsible and quality-conscious. You are analytical, enterprising, practical and you like taking own initiative.

You are also a good communicator and a team player. You are fluent in English and you like travelling as part of your job. Your social situation should allow 100-120 travel days per year.

For more information, please call Peter Ternebring from Confidera Urval, telephone +46 (0)70 – 639 88 89. You will find more information at [www.sensorsystems.se](http://www.sensorsystems.se)
